Sec1 Ch16 SLA2013 P69 L21 SB18 \$9,500,000

**Project Description/Justification:**

These grants improve preparedness, response, mitigation, and recovery abilities of local and state governments, which are core capabilities critical to achieving the DHS National Preparedness Goal.

The State Homeland Security Program (SHSP) supports state and local efforts to prevent terrorism and other catastrophic events, requiring 80% of the funding be passed to local units of government and no less than 25% used for law enforcement terrorism prevention activities. There is no state cost-share required for SHSP. Allocated based on eligible equipment or activities and based on Alaska's priorities developed through the Threat and Hazard Identification and Risk Assessment (THIRA) program, funding is used for equipment acquisition and deployment, development of homeland security and/or emergency management plans, and training and exercises for first responders.

The Building Resilient Infrastructure and Communities (BRIC) grant assists states, tribal governments, and local communities in implementing a sustained natural hazard mitigation program. While a portion of the funding is used to update or develop hazard mitigation plans for the state and local jurisdictions, the remainder is nationally competed for hazard mitigation projects. Allocated based on federal appropriations and priorities developed through the State of Alaska Hazard Mitigation Plan, the BRIC Grant requires a 25% non-federal cost-share funded by local jurisdictions for competitive projects or through funds from state disaster declarations.

The Emergency Management Performance Grant (EMPG) supports critical assistance to sustain and enhance state and local emergency management capabilities at the state and local levels for all-hazard mitigation, preparedness, response and recovery including coordination of inter-governmental (federal, state, regional, local, tribal) resources, joint operations, and mutual aid compacts state-to-state and nationwide. Sub-recipients must be compliant with National Incident Management System (NIMS) implementation as a condition for receipt of funds. This grant requires 100% match that is provided by the federal government.

The National Oceanic and Atmospheric Administration (NOAA) grant funds the manpower for NOAA (Emergency Management Specialist II) and all parts of the NOAA grant for sirens, community outreach, and sub grants to UAF and DNR.

The State and Local Cybersecurity Grant program supports state, local, and tribal governments in improving cybersecurity and addressing cybersecurity threats and risks to their IT systems. Eighty percent (80%) of funding is required to be passed to local and tribal government. Within that, a minimum of 25% is required go to rural areas.

If not funded, communities across Alaska would be denied opportunity to improve their resilience posture in anticipation of or in reaction to man-made or natural disasters.
